

ALSCO® Aluminum Building Products are environmentally friendly. As a vertically integrated manufacturer of aluminum building products, we optimize every step in the manufacturing process, resulting in superior aluminum building products.

FACTS:

- Your decision to use green products impacts our environment and can save builders & remodelers money
- ALSCO Aluminum Building Products are made of 96% recycled post-consumer aluminum feedstock like beverage cans, foil and other carefully selected recycled aluminum
- Recycling aluminum saves 95% of the energy needed to refine new aluminum from ore
- Aluminum can be recycled over and over while maintaining it's original properties
- ALSCO Aluminum Building Products can help support your LEED / NAHB or other green projects with sustainable aluminum building products
